Great. Thank you! I'm about to install it on my laptop so this is perfect timing.

Subject: FW: Access to SCRIBE data base

When you have downloaded SCRIBE to your computers per Jeff's last email, here are the IDs and PWs. I think both USACE and CB&I have people in their organizations that are familiar with SCRIBE and how it works. And if all else fails please feel free to call ERT – per Jeff's last email.

Thanks

Paula Schmittziel

Paula,

Here are the login and password info that I am aware of:

Scribe Project	Subscription ID	Password
Upper Animas Reassessment	AnimasSTART	AS
UpperAnimasRiver	UAnimas	AN!m@5

The bottom one is the one that is being used. The top one is from a removal action and the data came from the START contractor in 2011. I was mistaken, there are only two projects that I am aware of.

Scribe is case sensitive. Note the Subscription ID and Passwords are in both upper and lower case.

Please let me know if anyone has questions.

Jeff – Do they need a password to access SCRIBE for the Upper Animas? If so – is it the same password that we would use?

Hi Paula,

Setting up Scribe is easy. If the USACE folks do not have admin rights to install the software, they will need to coordinate that with their IT Dept. If they already have Scribe installed, all they need is the login and password to gain access to these data.

Mike Lenkauskas from CB&I's Boston office works with Scribe on the Libby site so they have some experience with Scribe in that office anyway.

USACE and CBI folks,

Please go to www.ertsupport.org to download the Scribe software. There is also a link on this site to Scribe documentation and on-line training.

There is also a phone number and email address for ERT Support. There is no charge for their support on the Scribe product.

I will be in the office today if anyone has any questions.

Subject: Access to SCRIBE data base

Jeff – I know we have a “mini-training” on data management schedule for June 2nd but in the meantime, I need you to set up access to SCRIBE for the Upper Animas site for USACE and their contractor, CB&I who are doing some data search and organization for us in advance of scoping an RI. They are on a very tight schedule to complete this work so as soon as you return to the office can you set it up. I’m not sure what is involved but I’m pretty sure that CB&I has some experience on SCRIBE from some other work they’ve done for us on another SF site.

I as well as Liz Fagen are out of the office all next week (May 26-30) in Silverton and at a watershed conference – I’m not sure from your last round of emails on the June 2nd meeting if you are in next week? If you are in, can you set it up with CB&I – I’ve copied USACE and CB&I on this email.

If you have any Qs on this request, you can try sending me an email or calling me on my cell phone but no guarantees that I can respond quickly. Thank you.
